

## What is your assessment of the competence based curriculum?

**Emmanuel Emokor,  
Deputy head teacher**

It is a good one. It brings out the competences of the student and you are able to see what a student can do outside school to earn a living. It is not about academics only but survival skills.

**Richard Waiswa,  
Career master MM**

It brings out what a learner is able to do, not only what they know. It shows us the expertise of the learner.

**Harriet Yariwo,  
Deputy head teacher**

It is a good curriculum and easy to implement especially if the materials are available for the learners to practice it is a doable curriculum.

**Lillian Mukubira,  
Head teacher**

It is a good curriculum. The problem is with the assessment methods and the different projects. We still need to train the teachers how to assess the different projects.
